A

Accident Prevention in the Iron and Steel Works of the U.S.A. Summary of report by A. Elson and P. Wright 241–243
Air-Blast Circuit Breakers for Arc Furnace Control 282
Alloy Steel Direction, Guide to, (Economy in Steel Alloying Elements) 31–32
Aluminium Alloy Barges for the Congo 134
Aluminium Alloys (Binary), The Properties of Some, at Elevated Temperatures. By J. V. Lyons and W. I. Pumphrey 219–226, 299–304
Aluminium-Sheathed Cable, Corrugated 237–240
Aluminium, Sheathing Cable with 175–178
Aluminium (Sintered) with High Strength at Elevated Temperatures. By Dr-Ing R. Irmann 125–133
Arc Furnace Control, Air-Blast Circuit-Breakers for 282
Architectural Letters in Metallised Plastic. By D. McPherson 249–250
Automatic Control of Soaking Pits 149

B

Babcock & Wilcox Research Station, The New 3–7
Barges (Aluminium Alloy) for the Congo 134
Binary Aluminium Alloys, The Properties of Some, at Elevated Temperatures. By J. V. Lyons and W. I. Pumphrey 219–226, 299–304
B.I.S.R.A. Conference. Discussion of report of the Productivity Team 244–248
Britain's Largest Steel Ingot .. 37
British Cast Iron Research Association, The. By J. G. Pearce, O.B.E. 193–194
British Ceramic Research Association, The New Laboratories of the. By A. E. Dodd 191–192
British Iron and Steel Research Association 179–180
British Steel Founders' Association, The Research and Development Division of the. By J. F. B. Jackson 231–236
British Welding Research Association, The. By K. Winterton 181–185
British Welding Research Association. New Fatigue Laboratory Opened at Abington .. 29–30

Page

C

Cable, Corrugated Aluminium-Sheathed 237–240
Cable Sheathing with Aluminium 175–178
Carbon Refractories Manufacture 87
Carburising (Pack), Factors Influencing. By E. Mitchell 61–72
Casting Alloy, New Elektron Magnesium-Zirconium-Zinc-Thorium 145–146
Cast Iron Metallurgy, Recent Developments in. By A. B. Everest 293–297
Circuit-Breakers (Air-Blast) for Arc Furnace Control 282
Coke (Metallurgical), The Production and Utilisation of. By J. P. Graham 74–78, 82
Cold Cathode Lighting in a Foundry 10
Congo—Aluminium Alloy Barges for the 134
Constitution of Alloys, Research on the 54
Control (Automatic) of Soaking Pits 149
Co-operative Research Activities 179–194
Co-operative Research in Iron Making. By K. E. Jermy .. 83–86
Copper Clad Aluminium, Applications of 39–40
Corrosion of Steel under Phosphate Coatings and Protective Finishes 305–307
Corrugated Aluminium-Sheathed Cable 237–240
Cupal 39–40

D

Distortion in Welded Work. Institute of Welding Presidential Address 185

E

Economy in Nickel-Iron Magnetic Alloys 34
Economy in Steel Alloying Elements. Guide to Alloy Steel Direction 31–32
Economy, Still Need for 267
Education and Training, Metallurgical 167–168
Electroplating, Review of Recent Developments in. By H. Silman 283–288, 298
Elektron Magnesium-Zirconium-Zinc-Thorium Casting Alloy, New 145–146
Elektron ZTl 145–146
Elevated Temperatures, The Properties of Some Binary Aluminium Alloys at. By J. V. Lyons and W. I. Pumphrey .. 219–226, 299–304
Exports, Speed the 217

Page

F

Fatigue Laboratory (New) Opened at Abington. British Welding Research Association 29–30
Forging Industry, Recent Applications of High-Frequency Induction Heating in the. By P. D. Jenkins.. 119–124
Fuel and Metals. (Edward Williams' Lecture). Prof. R. J. Sarjant 2
Fulmer Research Institute "Open Day" 195–198
Furnaces (Two Laboratory) for Melting Titanium Alloys. By J. A. Rees and R. J. L. Eborall 186–190

G

Gravity Aids Nickel Ore Recovery 14
G.W.B. Comes of Age 15

H

Handling—The New Technology 227–230
Heat Treatment Installation, Tool Room 252
Heenan and Froude's Golden Jubilee 35–37
High Frequency Induction Heating in the Forging Industry, Recent Applications of. By P. D. Jenkins.. 119–124
Hot Dip Galvanizers Association Meeting 168

I

Induction Heater, Low Frequency 281–282
Institute of British Foundrymen, Annual Conference at Buxton 19–28
Institute of Welding Presidential Address 185
International Machine Tool Exhibition 135–144, 146
Iron and Steel Productivity .. 11–14
Iron Making, Co-operative Research in. By K. E. Jermy.. 83–86
Iron Ore Position, The 79–82

L

Laboratory Furnaces (Two) for Melting Titanium Alloys. By J. A. Rees and R. J. L. Eborall 186–190
Light Alloy Luxury Yacht Built on Two-Way Tension System 88
Light Alloy Roofing at Alexandra Palace 100
Lighting (Cold Cathode) in a Foundry 10
Low Frequency Induction Heater 281–282

Page

M

Machine Tool Exhibition, The International 135–144, 146
Metallised Plastic, Architectural Letters in. By D. McPherson 249–250
Metallurgical Coke, The Production and Utilisation of. By J. P. Graham 74–78, 82
Metallurgical Education and Training 167–168
Melting Furnaces (Rotary) .. 99–100
Melting Titanium Alloys, Two Laboratory Furnaces for. By J. A. Rees and R. J. L. Eborall 186–190
Microscopy, Metallurgical. Henry Clifton Sorby. By E. N. Simons 199–200
Mousetraps, Better 117

N

Nickel-Iron Magnetic Alloys, Economy in 34
Nickel Ore Recovery, Gravity Aids 14

P

Pack Carburising, Factors Influencing. By E. Mitchell .. 61–72
Patent Act, 1949, in Action. By S. T. Madeley 33–34
Phosphate Coatings and Protective Finishes, The Corrosion of Steel under 305–307
Pig Iron—The Key to Expanding Steel Production 73
Planning and Productivity .. 1
Plansee Seminar, The 94–98
Plastic (Metallised), Architectural Letters in. By D. McPherson 249–250
Porous Stainless Steel 38
Powder Metallurgy as a Research Tool. By H. W. Greenwood.. 8–10
Powder Metallurgy Progress. By H. W. Greenwood .. 289–292, 298
Productivity 1, 11–14, 118, 217, 244–248
Push-Button Controlled Wheel Forging and Rolling Plant .. 275–280

R

Research Activities, Co-operative 179–194
Research and Development Division of the British Steel Founders' Association. By J. F. B. Jackson 231–236
Research (Co-operative) in Iron Making. By K. E. Jermy .. 83–86
Research Station, New: Babcock & Wilcox 3–7
Roll Foundry (New) at Crewe .. 16–18
Rolling and Wheel Forging Plant, Push-Button Controlled .. 275–280
Rolling Mill Drive, A Modern .. 147–149
Rotary Melting Furnaces 99–100

S

Sheathed Cable—Corrugated Aluminium 237–240
Sheathing Cable with Aluminium 175–178
Sintered Aluminium with High Strength at Elevated Temperatures. By Dr-Ing. R. Irmann 125–133
Soaking Pits, Automatic Control of 149
Soldering (Ultrasonic) in the Foundry 251–252
Sorby, Henry Clifton. A Pioneer in Metallurgical Microscopy. By E. N. Simons 199–200
South Wales, Tinplate Production in 169–174
Stainless Steel, Porous 38
Steel Company of Wales. Tinplate Production 169–174
Steel Control Plan 59
Steel Ingot, Britain's Largest .. 37
Steelmaking, Productivity in .. 244–248
Steel Production Expansion. (Pig Iron) 73
Steel, The Corrosion of, under Phosphate Coatings and Protective Finishes 305–307
Swinden Laboratories, The .. 89–93

T

Technology (Handling) 227–230
Titanium Alloys, Two Laboratory Furnaces for Melting. By J. A. Rees and R. J. L. Eborall 186–190
Tinplate Production in South Wales. New Plant in Operation at Trostre 169–174
"Tonquin," the All-Aluminium Yacht 88
Tool Room Heat Treatment Installation 252
Training and Education, Metallurgical 167–168
Trostre, New Plant in Operation at (Tinplate Production in South Wales) 169–174

U

Ultrasonic Soldering in the Foundry 251–252

V

Vanadium—The Possibility of its Production from Indigenous Sources. By J. Sandor .. 268–274

W

Welded Work, Distortion in, (Institute of Welding Presidential Address) 185
Wheel Forging and Rolling Plant, Push-Button Controlled .. 275–280

CORRESPONDENCE

Ductile Cast Iron, Some Experiments with. G. Singh .. 93
Precise Measurement of Fatigue Test Load. J. Dunbar, and M. H. Roberts 263–265

CURRENT LITERATURE

Reviews

LABORATORY METHODS

Aluminium Alloys, The Polarographic Determination of Nickel in. By E. C. Mills and S. E. Hermon. 259–262, 266

Aluminium and Magnesium Alloys and Pure Magnesium, A Note on the Comparison of Some Simple Condensed Spark Circuits in the Spectrographic Analysis of. By E. C. Mills and S. E. Hermon 213–215

Aluminium and Magnesium Alloys, A Semi-Quantitative Spot Test for Tin in. By J. Clark and W. Stross .. 215–216, 212

American Scientific Equipment Supplied to British Laboratories 114–116

Analysis (Metallurgical), Recent Developments in. I.—Electrochemical Analysis. By T. S. West 313–316

Antimony and Arsenic in Tin, The Photometric Determination of. By W. C. Coppins and J. W. Price 52–54

Arsenic and Antimony in Tin, The Photometric Determination of. By W. C. Coppins and J. W. Price 52–54

Cambridge Polarograph, Modification of the, for Derivative Polarography. By P. R. Pomeroy, R. A. White and G. H. R. Gwatkins 157–165

"Dead-Stop End Point" Titration Technique, Developments in the. By J. T. Stock.. .. 209–212

Derivative Polarography, Modification of the Cambridge Polarograph for. By P. R. Pomeroy, R. A. White and G. H. R. Gwatkins 157–165

Electrochemical Analysis. By T. S. West 313–316

Electrolytic Determination of Lead as Lead Dioxide, Use of Perchloric Acid in Removing Interferences Prior to the. By G. and I. Norwitz.. 318

Electrolytic Polishing of Copper and Copper-Base Alloys, Particularly Tin Bronze, A New Solution for the. By E. C. W. Perryman 55–57

Fatigue Test Load, Precise Measurement of. By M. H. Roberts 107–114

Page

Lead as Lead Dioxide, Use of Perchloric Acid in Removing Interferences Prior to the Electrolytic Determination of. By G. and I Norwitz 318

Magnesium and Aluminium Alloys and Pure Magnesium, A Note on the Comparison of Some Simple Condensed Spark Circuits in the Spectrographic Analysis of. By E. C. Mills and S. E. Hermon. 213–215

Magnesium and Aluminium Alloys, A Semi-Quantitative Spot Test for Tin in. By J. Clark and W. Stross .. 215–216, 212

Measurement (Precise) of Fatigue Test Load. By M. H. Roberts 107–114

Metallurgical Analysis, Recent Developments in. I.—Electrochemical Analysis. By T. S. West 313–316

Nickel, The Polarographic Determination of, in Aluminium Alloys. By E. C. Mills and S. E. Hermon 259–262, 266

Perchloric Acid, The Use of, in Removing Interferences Prior to the Electrolytic Determination of Lead as Lead Dioxide. By G. and I. Norwitz 318

Photometric Determination of Arsenic and Antimony in Tin. By W. C. Coppins and J. W. Price 52–54

Polarographic Determination of Nickel in Aluminium Alloys, The. By E. C. Mills and S. E. Hermon 259–262, 266

Polarography (Derivative), Modification of the Cambridge Polarograph for. By P. R. Pomeroy, R. A. White and G. H. R. Gwatkins 157–165

Polishing (Electrolytic) of Copper and Copper-Base Alloys, Particularly Tin Bronze, A New Solution for the. By E. C. W. Perryman.. 55–57

Scientific Equipment (American) Supplied to British Laboratories 114–116

Semi-Quantitative Spot Test for Tin in Magnesium and Aluminium Alloys. By J. Clark and W. Stross 215–216, 212

Solution (A New) for the Electrolytic Polishing of Copper and Copper-Base Alloys Particularly Tin Bronze. By E. C. W. Perryman 55-57

Spark Circuits (A Note on the Comparison of Some Simple Condensed) in the Spectrographic Analysis of Aluminium and Magnesium Alloys and Pure Magnesium. By E. C. Mills and S. E. Hermon.. .. 213–215

Spectrochemical Analysis of Tungsten, The. By C. H. R. Gentry and G. P. Mitchell .. 47–51

Spectrographic Analysis of Aluminium and Magnesium Alloys and Pure Magnesium, A Note on the Comparison of Some Simple Condensed Spark Circuits in the. By E. C. Mills and S. E. Hermon 213–215

Page

Spot Test (A Semi-Quantitative) for Tin in Magnesium and Aluminium Alloys. By J. Clark and W. Stross .. 215–216, 212

Tin Bronze, Copper and Copper-Base Alloys, A New Solution for the Electrolytic Polishing of. By E. C. W. Perryman .. 55–57

Tin in Magnesium and Aluminium Alloys, A Semi-Quantitative Spot Test for. By J. Clark and W. Stross 215–216, 212

Tin, The Photometric Determination of Arsenic and Antimony in. By W. C. Coppins and J. W. Price .. 52–54

Titration Technique, Developments in the "Dead-Stop End Point." By J. T. Stock .. 209–212

Tungsten, The Spectrochemical Analysis of. By C. H. R. Gentry and G. P. Mitchell .. 47–51
